Safety Data Sheet

According to U.S.A. Federal Hazcom 2012

1. Identification

1.1. Product identifier

Code: **17464355**
Product name: **Renergy HC**
Chemical name and synonym: **2-Hydroxybutanedioic acid**
EC number: **230-022-8**
CAS number: **6915-15-7**

1.2. Relevant identified uses of the substance or mixture and uses advised against

Intended use: **For use in animal feed**

1.3. Details of the supplier of the safety data sheet

Name: **Micronutrients USA LLC**
Full address: **1550 Research Way**
District and Country: **46231 Indianapolis Usa**
Tel.: **+1 (317) 486 5880**
Fax: **+1 (317) 486-5888**
e-mail address of the competent person responsible for the Safety Data Sheet: **HSE@selko.com**

1.4. Emergency telephone number

For urgent inquiries refer to: **For dangerous goods incident spill,leak, fire, exposure or accident call CHEMTREC day or night. Within USA and Canada: 1-800-424-9300 Outside USA and Canada: +1 703-741-5970 (collect calls accepted). Micronutrients +1 317-486-5880.**

2. Hazards identification

2.1. Classification of the substance or mixture

The product is classified as hazardous pursuant to the provisions set forth in OSHA Hazard Communication Standard (HCS) (29 CFR 1910.1200). The product thus requires a safety datasheet.
Any additional information concerning the risks for health and/or the environment are given in sections 11 and 12 of this sheet.

Classification and Hazard Statement

Eye irritation, category 2A

Causes serious eye irritation.

Hazard pictograms:

Signal words: **Warning**

Hazard statements:

H319

Causes serious eye irritation.

Precautionary statements:

Prevention:

P280

Wear protective gloves / eye protection / face protection.

P264

Wash hands thoroughly after handling.

Response:

P305+P351+P338

IF IN EYES: Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing.

P337+P313

If eye irritation persists: Get medical advice / attention.

Storage:

--

Disposal:

<div>Micronutrients USA LLC</div> <div>17464355 - Renergy HC</div>		Revision nr.2 Dated 10/8/2024 Printed on 10/8/2024 Page n. 2 / 9 Replaced revision:1 (Dated 8/14/2024)	EN
2. Hazards identification			
--			
2.2. Other hazards			
Information not available			
3. Composition/information on ingredients			
3.1. Substances			
Contains:			
Identification		Conc. %	Classification:
Malic acid		100	Eye irritation, category 2A H319
EC	230-022-8		
CAS	6915-15-7		
* There is a batch to batch variation.			
The full wording of hazard (H) phrases is given in section 16 of the sheet.			
4. First-aid measures			
4.1. Description of first aid measures			
EYES: Remove contact lenses, if present. Wash immediately with plenty of water for at least 15 minutes, opening the eyelids fully. If problem persists, seek medical advice.			
SKIN: Remove contaminated clothing. Wash immediately with plenty of water. If irritation persists, get medical advice/attention. Wash contaminated clothing before using it again.			
INHALATION: Remove to open air. In the event of breathing difficulties, get medical advice/attention immediately.			
INGESTION: Get medical advice/attention. Induce vomiting only if indicated by the doctor. Never give anything by mouth to an unconscious person, unless authorised by a doctor.			
4.2. Most important symptoms and effects, both acute and delayed			
Information not available			
4.3. Indication of any immediate medical attention and special treatment needed			
Information not available			
5. Fire-fighting measures			
5.1. Extinguishing media			
SUITABLE EXTINGUISHING EQUIPMENT			
The extinguishing equipment should be of the conventional kind: carbon dioxide, foam, powder and water spray.			
UNSUITABLE EXTINGUISHING EQUIPMENT			
None in particular.			
5.2. Special hazards arising from the substance or mixture			
HAZARDS CAUSED BY EXPOSURE IN THE EVENT OF FIRE			
Do not breathe combustion products.			
5.3. Advice for firefighters			
GENERAL INFORMATION			
Use jets of water to cool the containers to prevent product decomposition and the development of substances potentially hazardous for health. Always wear full fire prevention gear. Collect extinguishing water to prevent it from draining into the sewer system. Dispose of contaminated water used for extinction and the remains of the fire according to applicable regulations.			
SPECIAL PROTECTIVE EQUIPMENT FOR FIRE-FIGHTERS			
Normal fire fighting clothing i.e. fire kit (BS EN 469), gloves (BS EN 659) and boots (HO specification A29 and A30) in combination with self-contained open circuit positive pressure compressed air breathing apparatus (BS EN 137).

6. Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

If there are no contraindications, spray powder with water to prevent the formation of dust.

Wear suitable protective equipment (including personal protective equipment referred to under Section 8 of the safety data sheet) to prevent any contamination of skin, eyes and personal clothing. These indications apply for both processing staff and those involved in emergency procedures.

6.2. Environmental precautions

The product must not penetrate into the sewer system or come into contact with surface water or ground water.

6.3. Methods and material for containment and cleaning up

Collect the leaked product and place it in containers for recovery or disposal. If there are no contraindications, use jets of water to eliminate product residues.

Make sure the leakage site is well aired. Evaluate the compatibility of the container to be used, by checking section 10. Contaminated material should be disposed of in compliance with the provisions set forth in point 13.

6.4. Reference to other sections

Any information on personal protection and disposal is given in sections 8 and 13.

7. Handling and storage

7.1. Precautions for safe handling

Before handling the product, consult all the other sections of this material safety data sheet. Avoid leakage of the product into the environment. Do not eat, drink or smoke during use. Remove any contaminated clothes and personal protective equipment before entering places in which people eat.

7.2. Conditions for safe storage, including any incompatibilities

Store only in the original container. Store the containers sealed, in a well ventilated place, away from direct sunlight. Keep containers away from any incompatible materials, see section 10 for details.

7.3. Specific end use(s)

Information not available

8. Exposure controls/personal protection

8.1. Control parameters

Information not available

8.2. Exposure controls

As the use of adequate technical equipment must always take priority over personal protective equipment, make sure that the workplace is well aired through effective local aspiration. Personal protective equipment must comply with current regulations.

HAND PROTECTION

In the case of prolonged contact with the product, protect the hands with penetration-resistant work gloves (OSHA 29 CFR 1910.138). Work glove material must be chosen according to the use process and the products that may form. Latex gloves may cause sensitivity reactions.

SKIN PROTECTION

Wear category I professional long-sleeved overalls and safety footwear. Wash body with soap and water after removing protective clothing.

EYE PROTECTION

Wear airtight protective goggles (OSHA 29 CFR 1910.133).

RESPIRATORY PROTECTION

None required, unless indicated otherwise in the chemical risk assessment.

ENVIRONMENTAL EXPOSURE CONTROLS

The emissions generated by manufacturing processes, including those generated by ventilation equipment, should be checked to ensure compliance with environmental standards.

9. Physical and chemical properties				
9.1. Information on basic physical and chemical properties				
Properties	Value	Information		
Appearance	solid powder			
Colour	white			
Odour	characteristic			
Odour threshold	not available			
pH	not available			
Melting point / freezing point	130 °C			
Initial boiling point	130 °C	(266 °F)		
Boiling range	not available			
Flash point	203 °C	(397.4 °F)		
Evaporation rate	not available			
Flammability	not available			
Lower inflammability limit	not available			
Upper inflammability limit	not available			
Lower explosive limit	not available			
Upper explosive limit	not available			
Vapour pressure	not available			
Vapour density	not available			
Relative density	1.6			
Solubility	soluble in water			
Partition coefficient: n-octanol/water	not available			
Auto-ignition temperature	not available			
Decomposition temperature	not available			
Viscosity	not available			
Explosive properties	not available			
Oxidising properties	not available			
9.2. Other information				
Information not available				
10. Stability and reactivity				
10.1. Reactivity				
There are no particular risks of reaction with other substances in normal conditions of use.				
10.2. Chemical stability				
The product is stable in normal conditions of use and storage.				
10.3. Possibility of hazardous reactions				
No hazardous reactions are foreseeable in normal conditions of use and storage.				
10.4. Conditions to avoid				
None in particular. However the usual precautions used for chemical products should be respected.				
10.5. Incompatible materials				
Information not available				
10.6. Hazardous decomposition products				
Information not available				
11. Toxicological information				
In the absence of experimental data for the product itself, health hazards are evaluated according to the properties of the substances it contains, using the criteria specified in the applicable regulation for classification. It is therefore necessary to take into account the concentration of the individual hazardous substances indicated in section 3, to evaluate the toxicological effects of exposure to the product.

11. Toxicological information

11.1. Information on toxicological effects

Metabolism, toxicokinetics, mechanism of action and other information

Information not available

Information on likely routes of exposure

Information not available

Delayed and immediate effects as well as chronic effects from short and long-term exposure

Information not available

Interactive effects

Information not available

ACUTE TOXICITY

Does not meet the classification criteria for this hazard class

SKIN CORROSION / IRRITATION

Does not meet the classification criteria for this hazard class

SERIOUS EYE DAMAGE / IRRITATION

Does not meet the classification criteria for this hazard class

RESPIRATORY OR SKIN SENSITISATION

Does not meet the classification criteria for this hazard class

GERM CELL MUTAGENICITY

Does not meet the classification criteria for this hazard class

CARCINOGENICITY

Does not meet the classification criteria for this hazard class

REPRODUCTIVE TOXICITY

Does not meet the classification criteria for this hazard class

STOT - SINGLE EXPOSURE

Does not meet the classification criteria for this hazard class

STOT - REPEATED EXPOSURE

Does not meet the classification criteria for this hazard class

ASPIRATION HAZARD

Does not meet the classification criteria for this hazard class

12. Ecological information

Use this product according to good working practices. Avoid littering. Inform the competent authorities, should the product reach waterways or contaminate soil or vegetation.

12.1. Toxicity

Information not available

<div>Micronutrients USA LLC</div> <div>17464355 - Renergy HC</div>		Revision nr.2 Dated 10/8/2024 Printed on 10/8/2024 Page n. 6 / 9 Replaced revision:1 (Dated 8/14/2024)	EN

12.2. Persistence and degradability			
Information not available			
12.3. Bioaccumulative potential			
Information not available			
12.4. Mobility in soil			
Information not available			
12.5. Results of PBT and vPvB assessment			
On the basis of available data, the product does not contain any PBT or vPvB in percentage ≥ than 0,1%.			
12.6. Other adverse effects			
Information not available			
13. Disposal considerations			
13.1. Waste treatment methods			
Reuse, when possible. Neat product residues should be considered special non-hazardous waste.			
Disposal must be performed through an authorised waste management firm, in compliance with national and local regulations.			
CONTAMINATED PACKAGING			
Contaminated packaging must be recovered or disposed of in compliance with national waste management regulations.			
14. Transport information			
The product is not dangerous under current provisions of the Code of International Carriage of Dangerous Goods by Road (ADR) and by Rail (RID), of the International Maritime Dangerous Goods Code (IMDG), and of the International Air Transport Association (IATA) regulations.

Note for users:

The information contained in the present sheet are based on our own knowledge on the date of the last version. Users must verify the suitability and thoroughness of provided information according to each specific use of the product.

This document must not be regarded as a guarantee on any specific product property.

The use of this product is not subject to our direct control; therefore, users must, under their own responsibility, comply with the current health and safety laws and regulations. The producer is relieved from any liability arising from improper uses.

Provide appointed staff with adequate training on how to use chemical products.

CALCULATION METHODS FOR CLASSIFICATION

Product classification derives from criteria established by the OSHA Hazard Communication Standard (HCS) (29 CFR 1910.1200), unless determined otherwise in Section 11 and 12. The data for evaluation of chemical-physical properties are reported in section 9.
